Contributing towards making a greener future!

About nax PRO LV

nax PRO LV employs state of the art low VOC European technology that combines performance, durability and productivity for the repair shop. The comprehensive range of nax PRO LV ancillaries is compliant to EU 2004/42 standards and our answer to the growing requirements of low VOC environmentally friendly smash repair shops. By using nax PRO LV you gain the benefits of a complaint & productive system.

Products

nax PRO LV offers a complete range of high productive 2K clears and ancillaries that includes putty, plastic primers, anti-static degreasers and other products designed to complement the latest trends in technology. Simply put, nax PRO LV range provides excellent low VOC solutions for collision repair shops.

Low VOC paints

Volatile Organic Compounds (VOCs) are emitted by a wide range of products, including different paints. In general, VOCs are emitted as gases from certain solids or liquids and include a variety of chemicals, some of which may have short and long-term adverse health effects. Concentrations of many VOCs are consistently higher indoors (up to ten times higher) than outdoors. Low VOC paints are significantly better for the environment.

Why be VOC compliant

Increasing environmental regulations & consumer awareness, have paved the way for development of low VOC paints. These new generation paints along with being durable & cost effective are less harmful to the environment.

2K Clearcoats

nax PRO LV7600 VHS Performance Clear

Low VOC extra high solid two component clearcoat providing deep gloss, excellent flowability, hardness and protection over waterborne and solvent borne basecoats.

Can be polished after 15 min @ 60°C.
Ideal clearcoat for spot repair and respray.

FEATURES & BENEFITS

- Ideal for both spot repair and full respray
- One-and-half coats without flash off in small repairs
- High UV & chemical resistance
- Multiple hardener options (Fast & Medium)
- High productivity
- Durable finish

nax PRO LV7400 HS Clear

Low VOC two component clearcoat with excellent scratch resistant properties, UV resistance and weather protection over different types of basecoats. Ideal clearcoat for spot repair to full respray.

FEATURES & BENEFITS

- Toughest nax PRO LV clearcoat offering
- Excellent scratch resistance
- Ideal for both spot repair and full respray
- One-and-half coats without flash off in small repairs
- High UV & chemical resistance
- Multiple hardener options (Fast & medium & slow)
- High productivity

nax PRO LV7200 X'press Clear

Low VOC 2K acrylic clearcoat that is quick drying & scratch resistant with excellent UV protection. Recommended for fast panel repair for both waterborne and solvent borne systems.

FEATURES & BENEFITS

- Express panel clear
- Scratch resistant solution
- Polishable within 4 hrs (@ 30°C)
- Tough coating

nax **PRO LV**

Primers

nax PRO LV3000 Wash Primer 2K CF

Two-pack low VOC chromate free, fast drying anti-corrosive primer for pre-treatment of light metals and alloys. Can be used over abrasive blasted steel to provide optimal corrosion protection and adhesion to the subsequently applied coatings.

FEATURES & BENEFITS

- High corrosion resistance
- Excellent durability

nax Plastics Primer 1K

nax Plastic Primer 1K is a single component ready to use plastic adhesion promoter designed to support the adhesion of primers/surfacers and 2K topcoats to common plastic parts including polypropylene and its blends. It also adheres to various metal substrates.

FEATURES & BENEFITS

- Can be used on all plastics including PP mixtures, galvanized steel & aluminium
- Multi substrate application

nax PRO LV1001 Plastics Primer 1K (Aerosol)

nax PRO LV1001 Plastic Primer 1K Aerosol is a single component ready to use aerosol plastic adhesion promoter designed to support the adhesion of primers/surfacers and 2K topcoats to common plastic parts including Polypropylene and its blends. It also adheres to various metal substrates.

FEATURES & BENEFITS

- Wide variety of substrates including all types of plastics, polyester laminates, galvanized iron, aluminium, steel and SS substrates
- Multi substrate application

nax PRO LV1101 DTM Epoxy Spot Sealer (Aerosol)

nax PRO LV1101 DTM Epoxy Spot Sealer Aerosol is a versatile direct to metal epoxy based aerosol primer. Designed for covering exposed bare metal after sanding the primer surfacer, prior to application of basecoat.

Due to its anti-corrosive properties, it can be used as primer and spot primer for small repairs. Can also be used in wet on wet or sanding application.

FEATURES & BENEFITS

- Can be used in wet on wet and sanding applications
- Extremely versatile

Primer Filler/ Surfacers

nax PRO LV3601/04/07 VHS Primer Surfacer (White/Grey/Black)

Low VOC quick-drying two-pack wet on wet primer surfacer & sanding primer filler, with excellent application and sanding properties. Can be applied wet on wet on sound OEM e-coat with light scuffing & sprayed directly on well prepared plastic parts.

FEATURES & BENEFITS

- Wet on wet and dry sanding application
- Spectral shade range
- Direct application on ED coated panels without sanding
- Versatile
- Optimised hiding
- Easy application

nax PRO LV3200 Epoxy Primer Surfacer

Low VOC, 2K epoxy primer with high corrosion resistance, quick drying and excellent filling properties.

FEATURES & BENEFITS

- Wet on wet and dry sanding application
- Excellent filling properties over multiple substrates
- Versatile
- Outstanding productivity

Polyester Fillers

nax PRO LV Multifunctional Lightweight Bodyfiller

Two component fast drying multifunction polyester bodyfiller designed to fill and finish dents and surface irregularities in collision repair.

Provides excellent application, ease of sanding, as well as excellent adhesion to steel, galvanized steel, aluminum and small scratches in plastic.

FEATURES & BENEFITS

- Can be used on Al/MS/galvanized/small plastic repairs
- Excellent filling
- One step filling & finishing
- Multisubstrate application
- Usable for larger dents
- Complete filler solution

nax PRO LV2000 Light Filling Putty

2K polyester filler/putty designed to fill dents and surface irregularities in collision repair. Provides easy application & filling. Can be used for small and large repair areas. Provides good adhesion to steel and aluminium sheets.

FEATURES & BENEFITS

- Ease of application
- Excellent sanding
- Good adhesion
- Smooth finish
- Minimal effort
- Durable

Ancillaries

Thinners

nax PRO LV range has a complete assortment of thinners that supplement and control the drying speed of clearcoats, primers, surfacers, and other products, thereby providing optimal drying & performance in varied application conditions.

PRODUCT RANGE INCLUDES:

- nax Pro LV5000 Thinner Slow
- nax Pro LV5000 Thinner Medium
- nax Pro LV5000 Thinner Fast

Topcoat Blending Thinners

The fade-out thinners range provide very easy application, ease to blend topcoats & clearcoats, good flow levelling. Idea fade-out thinner for levelling optical difference in colour and joints.

FEATURES & BENEFITS

- Ready to use
- Excellent for levelling optical difference in colours/joints
- Easy application

PRODUCT RANGE INCLUDES:

- nax Pro LV5100 Topcoat Blending Thinner
- nax Pro LV5101 Topcoat Blending Thinner Aerosol

Ancillaries

nax PRO LV100 Universal Degreaser

nax PRO LV100 Universal Degreaser is an excellent multi use degreaser designed to efficiently clean all types of substrates found in automotive refinishes. It easily removes heavy contamination of grease, silicon, dirt & oil. Efficient first step degreaser of the surface preparation process.

FEATURES & BENEFITS

- Suitable for multi substrate application like ED coated, fillers, surfacers, steel, aluminium & GI
- Universal degreasing solution

nax PRO LV300 Anti-Static Degreaser

Degreaser with antistatic properties designed especially for plastic parts to minimize the static charge caused by friction from the cleaning cloth during degreasing. It easily removes grease, silicon, dirt, and oil and it can also be used for cleaning bare metal, primer surfacers or existing finishes.

FEATURES & BENEFITS

- Excellent for using on plastic parts
- Anti-static properties

nax PRO LV4200 Flexible Additive

nax PRO LV4200 Flexible Additive gives flexibility to the paint to suit application on flexible surfaces. Mainly used in paint application on plastic parts. Can also be used on elasticise paint coatings on the metal which eliminates exposure to stone chipping.

nax **PRO LV**

Ancillaries

nax PRO LV4100 Anti-Silicone

nax PRO LV4100 Anti-Silicone prevents pinholes which occur after contamination of surfaces with silicone or by grease. When added to paint it prevents formation of craters (fish eye) in case of improperly cleaned surface.

nax PRO LV4000 Accelerator

nax PRO LV4000 Accelerator reduces the drying and curing time of two-component acrylic & polyurethane products. It is specially recommended for low temperature and high humidity applications.
