nax Premila

nax Premila 2K is a complete solvent borne solution for the automotive refinish market. It is a premium, cost effective 2K, basecoat and acrylic master tint system, combined with a comprehensive range of clears, primers, thinners, hardeners and ancillaries.

nax Premila provides excellent aluminium orientation, exceptional DOI, flow and levelling and good opacity. With a wide range of colours and easy colour matching, nax Premila 2K is easy to use and change over, with minimum fuss and maximum benefits.

Solutions

nax Velocity Solution

The nax Velocity repair solution is designed to deliver an ultra-fast repair solution in ambient conditions, thereby vastly improving your efficiency & reducing workshop cost.

nax Velocity line offers the ideal solution for the quick repair process and is recommended in high traffic body shops or where the users focus is on efficiency and productivity. Designed to turn around the customer's vehicle with light repair within two hours the nax Velocity repair system gives a substantial reduction in time & energy over conventional repair systems, under similar ambient conditions.

Singular dents can be repaired within 100 minutes & multiple small dent repairs can be performed within 150 minutes, without the need for IR lamps or other forced drying techniques.

nax Premila 9800HP Velocity Clear 2K 2:1

Ultra-fast curing premium clearcoat for improved productivity. Dry to polish time of less than 30 minutes under ambient cure conditions (25-30°C). No need of baking cycle, allows for a quick repair. nax Premila 9800HP Velocity Clear also offers outstanding application properties with excellent gloss and appearance.

FEATURES & BENEFITS

- » Ultra-fast curing
- » Dry to polish in less than 30 mins at ambient conditions
- » Excellent gloss
- » Easy to polish

nax 2800HP 2K Velocity Primer

High productive super-fast drying, 2K HS sanding primer filler with excellent application and sanding properties. Due to its super-fast ambient drying, the total preparation time can be reduced to one hour. Provides exceptional enamel hold-out with all topcoats. Can be sanded after 30 minutes drying at 20°C.

FEATURES & BENEFITS

- » 1-2 minutes flash off time between coats
- » Dry to sand in 15 minutes at ambient temperature
- » Extra fast application process

Clearcoats

nax Premila 9800 Clear 2K Premium Hi-Solid 2:1

Premium two component high-solid, high-performance acrylic urethane clear. Provides deep gloss/brilliance and protection over different types of basecoats with excellent chemical resistance and UV protection.

FEATURES & BENEFITS

- » Can be applied in 1 and a half coats for improved production
