Update to Nax Premila MT802  
Threne Blue 1L

# Product Announcement

## Update to Nax Premila MT802 Threne Blue 1L

Due to a pigment no longer being available, Nippon Paint are required to make a change to the MT802 Threne Blue 1L Tinter. Please read the below details on the changes that will be made.

### Details:

Nippon Paint are releasing two new Tinters

- MT802 Threne Blue 1L - 40NMT802-1L This will keep the same order codes and will role through when the new stock arrives. This will be used for metallic colours
- MT802S Threne Blue 1L - 40NM802S-1L Is a new SKU – 802S is used in Solid colour
- We are still awaiting stock of the new Tinters and currently hold stock of the original 802 Tinter. The current 802 Tinter is still available to order.
- Since the most recent colour database update that was shared from Nippon Paint, the new 802 and 802S Tinters now appear in the formulas on Paint Partner. Customers can continue to use the current 802 Tinter for either 802 or 802S formulations.

Once the new tinters are in stock, we will send out a notification. New cans will have an identifier placed on the can lid.

For any further information please contact your Dulux Automotive account manager.
